DETAILED ACTION

Election/Restrictions

1. Due to the last amendment of claims filed on 6/28/08, further restriction requirement is necessitated as follows:
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under pct Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required in reply to this action to elect a single invention to which must be restricted.

- A: claim(s) 1, 3-5 and 17-21, drawn to a device for shaving hairs with a base portion having a grip.
- B: claim(s) 16, drawn to a shaving head for a device for shaving hairs with a coupling member.

The inventions listed as Groups or Inventions A-B do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special features for the following reasons: The technical feature of the invention A, as mentioned above, is not present in inventions B. Conversely, the technical features in inventions B are not present in invention A. It should be noted that inventions A-B are distinct from one another by having at least a specific feature that is not presented in the other inventions.

3. Should Applicant elect Group A, then Applicant is required to elect one of the following subgroups.

- A1: claim(s) 4, drawn to a device for shaving hairs with the periodical reciprocating motion in a direction substantially parallel to the main cutting direction.
- A2: claim(s) 5, drawn to a device for shaving hairs with a single straight cutting edge member.
- A3: claim(s) 17-18, drawn to a device for shaving hairs with a pre-tensioning member.
- A4: claim(s) 19, drawn to a device for shaving hairs with the actuator effecting the periodical motion of the cutting member via a transmission system.
- A5: claim 20, drawn to a device for shaving hairs with the shaving head releasably mounted to the base portion.
- A6: claim 21, drawn to a device for shaving hairs with the cutting member releasably mounted to the shaving head.

Claims 1 and 3 will be examined with the election of any one subgroup from A1 – A6.

- 4. Claims 1 links the inventions of subgroups A1 – A6. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 1 & 5. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104.

5. The inventions listed as subgroups or Inventions A1-A6 do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special features for the following reasons: The technical feature of the invention A1, as mentioned above, is not present in inventions A2. Conversely, the technical feature in invention A2 is not present in invention A1. It should be noted that inventions A1-A6 are distinct from one another by having at least a specific feature that is not presented in the other inventions.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
